

Shawn O'Rourke, Director of Engineering, holds a flexible-display demonstrator at ASU Flexible Display Center.

More on this topic

Flexible Display Center

Where: ASU Research Park in Tempe.

What: The facility is developing techniques for creating flexible displays for computer devices for consumers and the military.

Who: The center is receiving \$50 million over the next five years from the U.S. Army. Boeing, HP, General Dynamics and other companies pay dues to use the center's technology. ASU operates the center.
